

KHD Adjustable Drawbar

TRAILER TECHNOLOGY

Examples of possible applications

Thanks to a sophisticated and modern design, the KHD height-adjustable drawbar is not only good looking but also allows for an easy and elegant one-hand adjustment. The overrun brake is neatly incorporated and all unshapely components are tucked away within the body whilst being protected from the elements and mechanical damage at the same time.

Accessories

Many options available to make sure the KHD drawbar will fit on your trailer.

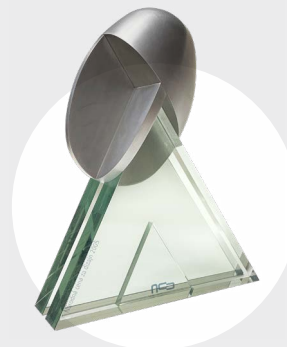

KEY FEATURES

- Produced from first-class quality components
- Comfortable and smooth one-hand height adjustment, ranging from -10° to 60°
- Load range from 900 kg to 3500 kg

Compact packaging

Covered braking mechanism

Simple one-hand operation

KNOTT SLOVAKIA

YOUR TAILOR-MADE MANUFACTURER

As a strategic member of the KNOTT Group we develop and produce key products in trailer technology. We are also involved in the production of sophisticated industrial brakes and have evolved into a high-quality airport ground support equipment manufacturer as well.

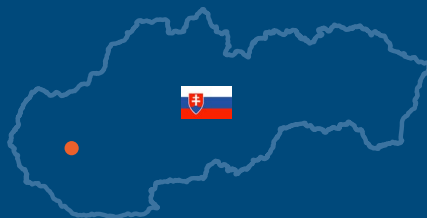

The ability to tailor our products to customer's needs, along with professional consulting and cooperation since the early development stages of a new product, as well as the in-house accredited testing laboratory are the main advantages of our company.

Paying attention to customer feedback, combining newest technologies with know-how based on decades-long experiences, and the implied highest product quality are characteristic for all companies within the Knott Group.
